

Dear FCC Commissioners & Staff:

As the owner of a small ISP in Southern California, paying a universal funding tax would be highly negative for my business. LEC's in general when given monopolistic control of a medium, use that power to eliminate the competition. I suffer through horrid ordeals by the hand of my LEC(verizon) due to generally BAD service and what appears to be total confusion in their company. This does effect my business directly in that, when a mistake is made(which usually happens) it renders me out of service or unavailable to my customers. PLEASE DON'T MAKE THINGS WORSE!!

Sincerely,

Eric Wolfe
